Lead Poisoning Prevention Program
Screening and Special Services
Oklahoma State Department of Health
1000 NE 10th Street

Telephone: (405) 271-6617 Toll Free:
1-800-766-2223

Purpose: The LERAQ is to be used to screen for possible lead exposure in children 6 -72 months of age.
Use: This assessment may be administered by medical staff or teacher, or completed by the child's parent or guardian.
Any "Yes" or "don't know" answer is considered a positive answer thus requires the child to have a blood lead test.

According to OCLPPP Case Management Guidelines, if a child has a blood lead test <5 ug/dl, reassess with the LERAQ in 1 year. No additional testing is necessary unless an exposure risk change has occurred. This Guideline does not supersede the federal CMS requirement that children enrolled in SoonerCare receive a blood lead test at 12 and 24 months of age as defined in the Child Health Check Up, also known as Early and Periodic Screening; Diagnosis and Treatment (EPSDT). Routing and Filing: Retain this record in the child's record to review annually.

ANEMIA RISK QUESTIONNAIRE

Patient Name: _____

Date of Birth: ____ / ____ / ____

1. Has your child ever been diagnosed with iron deficiency anemia?

Yes No

2. Do you ever have trouble getting food on the table?

Yes No
